

Pharmaceutical patents and medical supplies for epidemical diseases: The struggle in less developed countries

By Patrick Avato

GRIN Verlag Aug 2007, 2007. Taschenbuch. Book Condition: Neu. 210x148x5 mm. This item is printed on demand - Print on Demand Neuware - Diploma Thesis from the year 2004 in the subject Economy - Health Economics, grade: 1.0 (A), University of Tübingen (Wiwi Faculty), 98 entries in the bibliography, language: English, abstract: The last century has been characterized by great advancements of pharmaceuticals and a worldwide rise of life expectancy. Improvements in medical research have yielded significant progress in treating diseases that only recently were deemed incurable. This is most obvious in the case of HIV/AIDS where considerable public and private investments have converted this killer into a manageable chronic disorder for many in the developed world. However, treatment is out of reach for almost 90 percent of the millions of infected people in the developing world. Tragically, AIDS is not the only pandemic threatening the developing world. Malaria and Tuberculosis are only the most prominent of a large number of epidemical diseases affecting the world's poor. Overall, about ten million people die through infectious diseases each year, more than 90 percent of whom in the developing world. These people do not receive treatment for their diseases either because...
