Well, you've got a choice: buy this book, or buy ten others. . . Creating a website in today's environment is no longer a question of knowing about one piece of software, or one technology. To achieve the best results, you need broad knowledge on a range of topics: HTML to create pages, Cascading Style Sheets (CSS) to format your text, JavaScript to create interactivity, image editing software like Fireworks and Photoshop to prepare images, Macromedia Flash to add multimedia content. Foundation Web Design is a step-by-step guide to stunning website creation. Starting with the basics, and assuming no prior knowledge, Sham Bhangal cuts through the jargon and introduces a wide range of essential skills and technologies. These combine to help you create a fully operational and graphically stunning case study website. About the Authors: Sham Bhangal's unique tutorial style has found success in friends of ED Foundation titles such as Foundation ActionScript, heralded by Amazon.com as perhaps one of the finest introductory programming books ever written. Tomasz Jankowski, who designed the case study...
